MARKET weekly onions (52 pages)
Onion: Harvest: The observations made in the report on the harvest are confirmed: The large quantity in reality led to the expectation of the area for about 10%. The plants are not high, despite steady rainfall and early harvest. The crop was not too much with the cold spring and the low temperature in the autumn.
Yield: About 50% of the stored onions, the share of high-stored onions has increased compared to the previous year. The remaining share of low-stored onions is 4% of the stored onions, 4% of the stored onions are graded smaller than 40 mm, about 11% are larger than 70 mm.
Markets: In the Netherlands, export volumes are below the processing capacities. In part, demand fluctuates in the direction of destination. On average, 100,000 t of onions are exported. On the other hand, the lack of consumer availability may lead to lower prices. Prices for normal yellow onions (medium sized) are around 17.00 EUR/100 kg in an average. For big onions with 10-15 EUR/100kg.
Last week: Prices of the highest quality onions are still relatively low. The price for yellow onions in the Netherlands is at 10.50-12.00 EUR/100 kg in an average. For big onions in an average (medium sized) prices are 10.00-12.00 EUR/100 kg in an average. For big onions in an average (medium sized) prices are 10.00-12.00 EUR/100 kg in an average.
